Projects
jaygriff.com/projects

jaygriff.com — Personal Platform
- Full-stack content and development platform powering posts, docs, and webapps in one repo
- Built custom component system, dev tools, and content pipeline for rapid iteration

ByTheHour — AI-Native Time Blocking App
- Time blocking app with natural language scheduling using LLM structured outputs
- Creates, edits, and deletes multiple time block event details with a simple chat interface

Strava Analyzer — Fitness Data Analytics
- Connects to the Strava API, analyzes user activity and stream data, and presents visualizations
- Runs entirely client-side to protect privacy, and uses caching to reduce API calls

Locus — Chrome Extension
- Fast bookmark launcher with fuzzy search and keyboard navigation for large bookmark libraries
- Uses hotkeys to launch apps in the browser like Spotlight Search

Bootstrap Full-Stack Webapp — Next.js Boilerplate
- Next.js boilerplate with theme system, component library, and dev tooling
- Bootstrapped multiple projects: jaygriff.com, Strava Analyzer, Fitness Data ETL Platform

Bootstrap Frontend Webapp — Vite Boilerplate
- Lightweight Vite boilerplate using my underlying stack and tooling
- Bootstrapped Locus Chrome extension and other frontend projects

Core Skills
jaygriff.com/my-stack

Languages: TypeScript, JavaScript, HTML, CSS, Shell
